BRIEF CONTENTS

Acknowledgments xvii
Introduction xix

PART I: FOUNDATIONS

Chapter 1: Python Basics for Mathematical Thinking 3
Chapter 2: Turtle Geometry 37
Chapter 3: Functions and Derivatives 83
Chapter 4: Integrals and the Fundamental Theorem 125
Chapter 5: Differential Equations and Vectors 157

PART II: EXPLORATIONS

Chapter 6: Linear Algebra and Vector Graphics 201
Chapter 7: Dynamical Systems and Chaos 243
Chapter 8: Machine Learning from Scratch 275
Chapter 9: Decomposing Signals with Fourier Transforms 311

Appendix: Precalculus 351
Resources 361
Index 363

CONTENTS IN DETAIL

ACKNOWLEDGMENTS **xvii**

INTRODUCTION **xix**

Who Is This Book For? xxi
What's in This Book? xxi
Getting Started with Jupyter Notebooks xxiii

PART I
FOUNDATIONS

1
PYTHON BASICS FOR MATHEMATICAL THINKING **3**

Basic Operations 5
Performing Arithmetic 5
Performing Logic with Booleans 7
Working with Strings 10
Calling Functions 11
Working with Variables 14
Reassignment 15
F-Strings 16
Keywords 16
Displaying Values with the print Function 17
Control Flow 18
Branching Using if Statements 18
Repeating Code Using Loops 20
Importing Code from a Module 23
Using the time Module 23
Animating with IPython 24
Estimating Limits 25
The Compound Interest Formula 25
The Implementation 28
Limits, Fractions, and Long Division 29
Debugging 30
What You Learned 31
Exercises 32

2
TURTLE GEOMETRY **37**

A New Way to Teach Mathematics 38
Using Turtle Geometry with Jupyter Notebooks 40
Creating a Turtle Object 41
Moving the Turtle 42
Navigating Space with Coordinates 45
Drawing Grids with Nested Loops 46
Differential State Changes 49
Defining Difference Equations 49
Modeling Interactions 52
Defining Python Functions 56
Creating a Square-Drawing Function 56
Making Functions Flexible with Parameters 58
Writing Recursive Functions 60
Creating a Circle-Drawing Function 61
Returning Values 64
Managing Data with Lists 66
Creating Lists 66
Accessing the Elements of a List 66
Modifying a List 68
Using Lists with Loops 69
Unpacking Lists 70
Creating a Color Palette 71
Defining Color Lists 71
Interpolating Colors 72
What You Learned 75
Exercises 75

3
FUNCTIONS AND DERIVATIVES **83**

Mathematical Functions 85
Definition 85
Composition 87
Plotting 88
Inverses and Non-Functions 91
Building a Graphing Calculator 93
Creating a Python Module 93
Plotting Functions 94
Defining Mathematical Functions in Python 98
Plotting Functions 99
The Epsilon-Delta Definition of Limits 101
Formalizing Derivatives 103
The Difference Quotient 103
Limits of Difference Quotients 104
Tangent Lines 105

Higher Derivatives 109
Differentiation Rules 110
Estimating Derivatives with Python 112
Estimating Finite Differences 113
Drawing Tangent Lines 114
What You Learned 115
Exercises 116

4
INTEGRALS AND THE FUNDAMENTAL THEOREM 125

Formalizing Integrals 127
Antiderivatives 127
Riemann Sums 129
Definite Integrals and the Fundamental Theorem 138
Performing Numerical Integration with Python 142
Calculating Riemann Sums 142
Analyzing Performance 144
Drawing the Area Under the Curve 145
What You Learned 149
Exercises 149

5
DIFFERENTIAL EQUATIONS AND VECTORS 157

Solving Ordinary Differential Equations 159
Separation of Variables 159
Euler's Method 161
Higher-Order Differential Equations 164
Euler's Method in Python 166
Vector Arithmetic 167
Different Views of Vectors 167
Vector Addition 171
Scalar Multiplication 172
Vector Subtraction 174
Vector-Valued Functions 175
NumPy Arrays 178
Creating ndarray Objects 178
Performing Operations and Broadcasting 181
Calling Universal Functions 182
Programming with Vectors 184
Simulating Surface Gravity 184
Simulating Gravity Between Bodies 185
Observing the Chaos of the n-Body Problem 189
What You Learned 193
Exercises 193

PART II
EXPLORATIONS

6
LINEAR ALGEBRA AND VECTOR GRAPHICS 201

The Building Blocks of Linear Algebra 202
- Linear Combinations 203
- Vector Spaces 204
- Span and Bases 205

Advanced Vector Operations 206
- Hadamard Product 206
- Inner Product 206
- Linear Combinations and Advanced Operations with NumPy 209

Matrices 211
- Rows and Columns 211
- Operations 212
- Linear Transformations 213
- Changing Bases 216

Matrix Operations with NumPy 217
2D Vector Graphics 221
- Transformation Matrices 221
- Homogeneous Coordinates 226
- Wireframe Drawings 233

What You Learned 236
Exercises 236

7
DYNAMICAL SYSTEMS AND CHAOS 243

Describing Dynamical Systems 244
- Drawing State Spaces 245
- Representing Dynamics with Derivatives 246
- Integrating Dynamical Systems 247
- Calculating Vector Fields 249
- Visualizing a Time Series 251

Coding Vector Fields 252
- Drawing the Vector Field 252
- Computing Trajectories 258

Chaotic Systems 261
- Lorenz Systems 261
- Atmospheric State Visualizations 262
- Drawing 3D Trajectories 267

What You Learned 272
Exercises 272

8
MACHINE LEARNING FROM SCRATCH 275

Gradients ... 277
Multivariable Functions ... 277
Partial Derivatives ... 279
Gradient Vectors ... 280
Plotting Surfaces with NumPy ... 282
Drawing Quadrilaterals ... 282
Creating Grids with NumPy ... 284
Drawing Surfaces ... 286
Optimization ... 290
Minima, Maxima, and Inflection Points ... 290
Gradient Descent ... 292
Machine Learning ... 295
Understanding Predictions, Errors, and Backpropagation ... 295
Loading Data ... 297
Coding the Model ... 299
Interpreting Model Performance ... 301
What You Learned ... 303
Exercises ... 304

9
DECOMPOSING SIGNALS WITH FOURIER TRANSFORMS 311

Function Spaces ... 312
Functions as Vectors ... 313
Delta Functions ... 315
Bases of Function Spaces ... 318
Complex Exponential Functions ... 319
Imaginary Numbers ... 319
Complex Numbers ... 321
Euler's Formula ... 323
Complex Waves ... 324
Complex Numbers with Python ... 326
Discrete Fourier Transforms ... 328
Understanding Signals and Similarity ... 328
Formalizing Fourier Transforms ... 333
Writing Discrete Fourier Transform Matrices ... 334
Coding the Discrete Fourier Transform ... 336
Fast Fourier Transforms ... 339
Deriving the Fast Fourier Transform ... 340
What You Learned ... 345
Exercises ... 346

APPENDIX: PRECALCULUS **351**

Algebra 351
Arithmetic 352
Variables 352
Solving Equations 352
Geometry 353
Degrees and Radians 353
Pythagoras's Theorem 354
Trigonometric Ratios 355
The Unit Circle 356
Sine Waves 357
Exponents and Logarithms 358
Properties of Exponents 358
Properties of Logarithms 359

RESOURCES **361**

INDEX **363**
